❖ Professional Summary

Dynamic and detail-oriented Full-Stack Developer with 6 months of hands-on experience in building scalable web applications. Proficient in the MERN stack, with a strong focus on building responsive UIs and optimizing data fetching using React Query and Redux Toolkit. Experienced in developing robust backend architectures with Node.js and Ruby on Rails. Proven ability to bridge the gap between user requirements and technical implementation, delivering efficient, production-ready code.

❖ Experience:

Datics AI || **Software Engineering Trainee MERN** (Jan 5 – Present)

- **High-Performance Frontend Architecture:** Dynamic user interfaces using Next.js and React 18, leveraging Server-Side Rendering (SSR) and Static Site Generation (SSG) to optimize SEO and initial load times.
- **Advanced State Management:** Architected complex global state solutions using Redux Toolkit (RTK), implementing specialized slices and middleware to handle asynchronous logic and ensure predictable data flow across large-scale applications.
- **Server-State & Data Fetching:** Utilized TanStack Query (React Query) for server-state management, implementing advanced caching strategies, "stale-while-revalidate" logic, and optimistic updates to reduce redundant API calls.
- **Scalable Backend Integration:** Developed and integrated high-performance RESTful APIs using Node.js and Express, with MongoDB and Postgresql ensuring seamless communication between the client and server.

Recurso Lab || **MERN Stack Intern** (Jun 2025 – Sep 2025)

- **Secure Authentication & Authorization:** Developed and integrated RESTful APIs secured with JSON Web Tokens (JWT), implementing protected routes and role-based access control to ensure secure user sessions.
 - **Full-Stack E-Commerce Architecture:** Architected a robust automotive e-commerce platform using Next.js and the MERN stack, implementing a SQL approach with PostgreSQL.
 - **AI Assistant & RAG Implementation:** Integrated an intelligent chat agent using Retrieval-Augmented Generation (RAG), leveraging Neon vector database and tool calling for dynamic data retrieval.
 - **Agile Methodology & Version Control:** Collaborated within an Agile environment, utilizing Git for version control and participating in sprint cycles to deliver incremental feature updates and bug fixes efficiently.

❖ Projects:

1. AI-Driven Human Resource Management System – FYP

Technologies: React.js, Redux, Node.js, Express.js, MongoDB, Gemini and Developed a full-stack AI-based HRMS using the MERN stack.

Automated leave scheduling, mood analysis, and HR task management.

Live: [Metro HRMS/](#)

❖ Skills:

Development: HTML5, CSS3, Bootstrap, Tailwind CSS, MUI, JavaScript (ES6+), React.js, RTK, React Query, Node, Express.js, MongoDB, SQL, Postgres, Next.js, Ruby on Rails, MVC, Active Record, Associations, Routing, RESTful APIs.

❖ Education:

Bachelor of Science in Information Technology (BSIT) *University of the Punjab* (2021 – 2025) Lahore.
